

- Update the backlog with epics and descriptions
- Discussed the project release notes
 - The way we did it was fine for this week as it followed the instructions on canvas, but for next week make through github.
- Showed what we did last week.
- **Plan for next week:**
 - Finish the API so we can populate the books section
 - Finish the database so we can populate the class notes and allow the user to sign in.
 - Start on the basic backend, login, register, bookmarks.

Commit table 4/12 - 4/18
